September 2011

Revised 06/28/2012

Development of this directory was supported by funding from the USDA Forest Service.

Sawmill in McNary, Arizona, owned at the time by Southwest Forest Industries; 1960

In accordance with Federal Law and U.S. Department of Agriculture policy, this institution is prohibited from discriminating on the basis of race, color, national origin, sex, age, or disability. (Not all prohibited bases apply to all programs.) To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.

ACKNOWLEDGEMENTS

Special thanks are given to all the businesses that provided information for the directory. In addition, Molly Pitts of the Northern Arizona Wood Products Association was also instrumental in guiding the content for the directory. The Arizona State Forestry Division would also like to acknowledge that funding for the development of this directory was made available by USDA Forest Service.

PREFACE

The purpose of this document is to help the public and industry professionals locate and make contact with firms that are part of the Arizona's forest industries. While every effort was made to ensure the accuracy of the information presented, some items may have changed since the time this document has been published. This directory is a continuation of the forest products directory compiled in 1994 by Robert Larson and John Cencioso at Northern Arizona University.

Arizona's forest industries are comprised of many different firms and do play an important role in maintaining healthy forests and economic activity. In 2009 the gross domestic product of Arizona's forest industries was calculated to be \$410 million by the Bureau of Economic Analysis¹. Trade information for 2009, shows that Arizona's forest industries exported \$235 million worth of products to twenty-nine different countries².

Development of this directory was done through a questionnaire. Adjusting for the number of erroneous addresses and businesses that were no longer involved in the forest industry, the response rate was 50.8 percent.

DISCLAIMER

The Arizona State Forestry Division does not endorse or recommend any of the contractors listed herein. Nor is the Arizona State Forestry Division responsible for the results of quantity, quality, or professionalism of any work performed. Interested parties are strongly urged to ensure that the contractor chosen to do the work is properly insured, bonded, and licensed.

While a list of "Products Manufactured" is given for each company, the consumer is encouraged to contact the company for confirmation and investigation of additional services each company may provide. This directory is for informational purposes only and does not constitute a comprehensive listing.
